

ACLS PROVIDER SKILLS VERIFICATION FORM

After completing Pacific Medical Training's online ACLS course, email this completed form with your instructor's ACLS instructor credential to support@pacificmedicaltraining.com. The instructor must hold a valid American Heart Association instructor credential. They will initial each area that has been successfully completed. Please note that the instructor does NOT issue you a new card. Your Pacific Medical Training ACLS card is issued directly from Pacific Medical Training.

Basic cardiac life support

SKILL	PASS	Requires remediation
Recognize lack of normal breathing and pulse <ul style="list-style-type: none">• Activate the EMS or internal emergency system• Either get or send someone to get the AED• Perform compressions while AED charges		
Initiate compressions at a rate of 100–120/min <ul style="list-style-type: none">• Compress the chest at least 2 inches• Allow complete chest recoil• Change compressors every 2 minutes		
Open the airway using the head tilt/chin lift <ul style="list-style-type: none">• Ventilate successfully using a ratio of 30:2		
Attach and utilize the AED as soon as it arrives <ul style="list-style-type: none">• Continue compressions while the AED charges• Initiate compressions immediately following shock• Clear for shock		

Megacode

SKILL	PASS	Requires remediation
Monitor efficacy of CPR throughout resuscitation		
Recognize the presence of VF/Pulseless VT <ul style="list-style-type: none">• Prepare and utilize the defibrillator• Utilize appropriate pad placement• Utilize appropriate output• Begin compressions immediately		
Obtain IV or IO access for medication <ul style="list-style-type: none">• Administer Epinephrine at appropriate intervals• Administer Amiodarone at appropriate intervals		
Consider the insertion of an advanced airway <ul style="list-style-type: none">• Ensure proper placement with clinical assessment• Ensure proper placement with the use of waveform capnography		

Search for reversible causes of cardiac arrest

Respiratory arrest

SKILL	PASS	Requires remediation
Recognize lack of normal breathing and pulse <ul style="list-style-type: none"> • Activate the EMS or internal emergency system 		
Open the airway using the head tilt/chin lift <ul style="list-style-type: none"> • Ventilate successfully 10/min 		
Consider the placement of an advanced airway <ul style="list-style-type: none"> • Verify placement with clinical assessment • Verify placement with wave capnography 		
If opioid use is a possibility, administer naloxone (Narcan) <ul style="list-style-type: none"> • Intranasal • Intramuscular 		

The above information is accurate to the best of my knowledge. The INSTRUCTOR holds a valid American Heart Association ACLS instructor credential. The STUDENT has successfully demonstrated the management of an adult cardiac arrest patient who presents with pulseless ventricular tachycardia and/or ventricular fibrillation.
